FAX: 732-591-8477

## *HOT MELT ADVANTAGES*

- **FAST** — *hot melts* produce a bond in seconds — no cure or dry cycle, shorter production lines, no space needed for storage parts while the glue sets, no drying ovens.
- **CLEAN** — using *hot melts* means no clean up at the end of the day and no mixing of two-part systems.
- **NON-TOXIC** — *hot melts* contain no hazardous solvents and there are no environmental problems with pollutants.
- **COMPACT** — *hot melts* are 100% solids — use all you buy, no evaporation losses, long shelf life, no shipping or storage problems.
- **SEALING** — *hot melts* bond dissimilar substrates — plastics, metals, wood, ceramics, leather, paper — often stronger than the substrates themselves.
- **RESILIENT** — *hot melts* can be used to dampen vibration, strengthen and stiffen materials, improve flexibility.
- **VERSATILE** — *hot melts* apply easily to most materials, bond to unique contours, permit invisible bonds and whole new approaches to assembly problems. Hot melts permit new manufacturing techniques not possible with fasteners, cold glues, or solvent-based adhesives.

*And much more!*
