

### **DIRECTIONS**

- ❑ Hold handle loosely in hand unwinding **Flat Twine®** from the bottom of the roll.
  
- ❑ To start, anchor **Flat Twine®** to item being wrapped by holding end with thumb until first overlap is complete.
  
- ❑ Continue wrapping around items — the more layers, the more secure
  
- ❑ For tensioning and/or a tighter hold, grasp handle firmly and pull the film as you wrap (essentially “stretching” it).
  
- ❑ To break off, hold handle tightly, stretch **Flat Twine®** on final wrap stopping on an edge or corner. Twist your hand in one quick, smooth motion while holding the roll against the wrappings
